

N-Counter

NPI's N-Counter provides a means to continuously monitor and record the number of pump strokes over a given operating period.

Monitoring the total number of pump strokes allows the operator to determine if the pump has been running at the expected rate. The totalizer may be configured for either re-settable or non re-settable operation.

N-Counter-1 also includes a pulse transmitter which is activated by the magnetic field of a solenoid style chemical metering pump during each discharge cycle.

Product Specifications

Display: 8 Digit LCD

Enclosure: NEMA 4X/IP65 Rated

Totalizer: Re-settable or Fixed

Environment: 0-50 Degrees Celsius

Power: Internal Lithium Battery provides up to 6 years of uninterrupted operation

Humidity: 85% maximum relative humidity, Non-Condensing

Shipping Weight: 1 lb.

Warranty: 2 years
