

KM_nO₄ Eductor System

NPI's Potassium Permanganate (KM_nO₄) eduction system is a simple and reliable way to hydrate dry chemical as it is pumped to your bulk or day storage tanks. The NPI system is capable of blending up to 22 pounds per minute of free-flowing, technical grade, KM_nO₄ powder.

NPI eductor systems provide a cleaner, safer and more accurate method of mixing potassium permanganate and limit operator exposure to dry chemical dust.

Dimensions:

Features of the KM_nO₄ Eductor:

- Isolating ball valves help prevent spills
- AWWA certified backflow prevention device standard
- Suitable for wall or skid mounting
- Clear pickup hose to easily monitor eductor performance
- Notched pickup tube helps to eliminate problems with clogging
- Robust, 1/2" polyethylene mounting shelf is corrosion & impact resistant
- Small, 48" x 24" x 12", size take up minimal space on wall or skid
- Automatic control made easy via solenoid or motorized ball valves
- Optional flow monitoring of makeup water rate and volume
